

## Products for Preserving Independence and Quality of Life

### What are the real costs of a fire incident?

Beyond the financial costs, there are costs that can't be measured- loss of life or injury, trauma, difficult evacuations for the elderly or disabled, eviction or displacement to name a few.

> **Be proactive rather than reactive.** Let **HomeSenser** turn OFF the heat source before a fire occurs. Keep our firefighters out of harm's way.

> Often cooking fires start within the first 15 minutes of cooking, showing that there is no safe period of time to leave cooking unattended.

> Fires caused by cooking remain the leading cause of home fires and home fire injuries, according to the NFPA.

"It does everything advertised and more. Installing a HomeSenser is as easy as connecting a range cord."

Akron Metropolitan Housing Authority
